SUMMARY

Mobile App Developer with 1 year 10 months of professional experience developing cross-platform mobile applications using Flutter and React Native. Hands-on experience across the full development lifecycle, including API integration, state management (GetX, BLoC, React Hooks), and responsive UI development for Android and iOS. Focused on performance, scalability, and clean architecture.

EXPERIENCE

Mobile App Developer (Flutter & React Native) — Infutrix Technologies Pvt. Ltd., Mohali March 2024 – Present

- Developed and maintained production-ready mobile applications using Flutter (Dart) and React Native, delivering high-performance cross-platform solutions.
 - Collaborated with backend teams to integrate REST APIs, handle authentication flows, and optimize app performance and scalability.
 - Implemented secure authentication, push notifications, real-time features, and responsive UI/UX across Android and iOS platforms.
 - Built modular, scalable, and maintainable codebases using modern state management approaches including GetX, BLoC (Cubit), Riverpod, and React Hooks.
-

KEY PROJECTS

Tax HelpDesk — Online Tax Filing Document Management App

[Play Store](#) [↗](#)

- Developed core modules using Flutter, improving app performance, UI consistency, and user experience.
- Integrated REST APIs for tax filing, document uploads, and verification workflows.
- Implemented secure authentication, push notifications, and real-time status tracking.

Isomeds — Online Medicine Ordering App

- Built a complete e-commerce medicine delivery app using Flutter and GetX state management.
- Implemented cart management, secure payments, prescription uploads, and order tracking.
- Ensured smooth user experience with responsive UI and optimized performance across devices.

FMS — Factory Management System (Current Project)

- Developing a factory workflow and operations management system using Flutter, shadcn/ui, and BLoC (Cubit) architecture.
 - Building modules for production tracking, order management, machine status monitoring, and employee task workflows.
 - Implementing clean UI components with shadcn styling and scalable state management with Cubit.
-

TECHNICAL SKILLS

- **Programming Languages:** Dart, JavaScript
- **Frameworks & Libraries:** Flutter, React native, GetX, Context API, BLoC (Cubit)
- **API & Web Services:** REST APIs, JSON, Postman
- **Backend Integration:** Firebase (Authentication, Firestore, Cloud Messaging)
- **Development Tools:** Git, GitHub, Android Studio, VS Code
- **Software Methodologies:** Agile Development, Clean Architecture, State Management

- **Platforms:** Android, iOS, Cross-platform Development
-

EDUCATION

Chandigarh University, Mohali, Punjab
Master of Computer Application

June 2022 – Mar 2024

Mirza Ghalib College, Gaya, Bihar
Bachelor of Computer Application

June 2018 – Mar 2021
