SUMMARY

Results-oriented Flutter Developer with 1.5+ years of experience in designing, developing, and deploying high-performance cross-platform applications for Android and iOS. Proficient in Flutter, Dart, and modern architectural patterns including GetX and BLoC (Cubit). Skilled in integrating RESTful APIs, building responsive and intuitive UIs, and optimizing application performance for enhanced user experience. Proven ability to collaborate effectively with backend and product teams to deliver scalable, maintainable, and business-aligned software solutions.

EXPERIENCE

Flutter Developer — Infatrix Technologies Pvt. Ltd., Mohali

March 2024 – Present

- Developed and maintained multiple production-ready mobile applications using Flutter, Dart, and modern state management architectures.
- Collaborated closely with backend teams to integrate REST APIs, optimize performance, and ensure seamless user experience.
- Implemented secure authentication, push notifications, real-time tracking, and responsive UI across diverse mobile platforms.
- Built modular and scalable codebases using GetX, BLoC (Cubit), and Riverpod for efficient state management.

KEY PROJECTS

Tax HelpDesk — Online Tax Filing Document Management App

- Developed core modules using Flutter, improving app performance, UI consistency, and user experience.
- Integrated REST APIs for tax filing, document uploads, and verification workflows.
- Implemented secure authentication, push notifications, and real-time status tracking.

Isomeds — Online Medicine Ordering App

- Built a complete e-commerce medicine delivery app using Flutter and GetX state management.
- Implemented cart management, secure payments, prescription uploads, and order tracking.
- Ensured smooth user experience with responsive UI and optimized performance across devices.

Kaam Dhanda — B2B and Job Portal

- Built a platform enabling job seekers to create professional resumes and apply for localized job opportunities.
- Added company-side hiring features including job posting, candidate shortlisting, and application tracking.
- Implemented real-time listings, user profiles, and category-based browsing with efficient Flutter UI.

FMS — Factory Management System (Current Project)

- Developing a factory workflow and operations management system using Flutter, shadcn/ui, and BLoC (Cubit) architecture.
- Building modules for production tracking, order management, machine status monitoring, and employee task workflows.
- Implementing clean UI components with shadcn styling and scalable state management with Cubit.

School Management System

- Built a school management app with modules for student attendance tracking, leave management, teacher–student chat, and anecdotal notes.

Video Player App (Freelancing Project)

- Developed a user-friendly video player app supporting online streaming and local video playback.
- Implemented smooth video controls and integrated GetX for state management and reactive UI updates.

- Optimized app performance to ensure minimal buffering and seamless playback across mobile and tablet devices.

Firestore Chat App

- Built a real-time chat app with Firebase Authentication, Firestore database, and cloud synchronization.
- Enabled one-on-one and group chat features with instant messaging, notifications, and image/emoji sharing.
- Implemented offline persistence and robust error handling for reliable app performance.

Quiz App

- Created an interactive quiz application with dynamic questions and real-time scoring.
- Implemented timer-based questions, score tracking, and local storage for high scores and user progress.
- Designed responsive UI for multiple screen sizes with Material Design principles.

TECHNICAL SKILLS

- **Programming Languages:** Dart, JavaScript
- **Frameworks & Libraries:** Flutter SDK, GetX, Riverpod, BLoC (Cubit), React Native
- **API & Web Services:** REST APIs, JSON, Postman
- **Backend Integration:** Firebase (Authentication, Firestore, Cloud Messaging)
- **Development Tools:** Git, GitHub, Android Studio, VS Code
- **Software Methodologies:** Agile Development, Clean Architecture, State Management
- **Platforms:** Android, iOS, Cross-platform Development

EDUCATION

Chandigarh University, Mohali, Punjab
Master of Computer Application

June 2022 – Mar 2024

Mirza Ghalib College, Gaya, Bihar
Bachelor of Computer Application

June 2018 – Mar 2021

CERTIFICATIONS

Flutter & Figma (Google Cloud), Core Java (Great Learning)
